

Self-Propelled Articulating Boom

or Bi-Energy power for all day use.

Genie. Industries

Make short work of big jobs.

With an extended reach, models with jibs, and a variety of new performance features, the Z-45/25 DC/Bi-Energy handles the most challenging high-reach jobs. The revolutionary Genie Bi-Energy system combines the quiet, emission-free and efficient operation of a 48V DC machine with the versatility of a diesel-powered generator machine to provide a boom that is ideal for indoor and outdoor applications.

Quick and Manoeuvrable

The Z-45/25's enhanced design helps get you where you need to go, quickly and easily. The new 1.52 m (5 ft) inside turning radius delivers excellent manoeuvrability. Z-45/25J models with a 1.52 m (5 ft) articulating jib boom are also available to provide a 135° range of motion.

Unsurpassed Speed and Gradeability

This 4x2 is the fastest boom in its class. Travels 4.8 km/h (3 mph) with 30% gradeability.

Dual Parallelogram Riser

Advanced design allows ascent and descent along a vertical plane with or without retraction or extension of the boom.

Large Platform with Hydraulic Rotation

The 6 ft (1.83 m) all-steel platform lifts up to 227 kg (500 lb). Dimensions of 76 cm x 1.83 m (30 x 72 in) allow ample space for two workers and their tools. Platform features a 180° hydraulic rotation for Z-45/25 models and a 160° hydraulic rotation for Z-45/25J models. Also includes automatic platform leveling with a manual hydraulic override system and an AC power outlet.

Ground Controls

Located at eye level with easy to understand controls and including auxiliary power, key switch, emergency stop, hour meter and boom functions.

Safety in Sight

All instructional and safety decals are straightforward and conveniently located to be clearly visible.

Drive Enable System

Informs operator when the drive and steer functions will move opposite controller movements.

Power for the Long Haul

The Bi-Energy always operates with the all new, Sep-Ex 48V DC drive system and has the added feature of an on-board diesel powered generator. The generator acts as a 100 amp battery charger to provide enough electrical power to operate all boom functions even when the batteries are fully discharged.

The Kubota Z482, 12 hp, water cooled, 2-cylinder, diesel powered generator package will charge a fully discharged machine in only 3.5 hours.

The Kubota Z482 diesel will operate for approximately 17 hours before refueling is necessary.

The direct electric, 48V drive system provides outstanding battery life when not using the engine generator.

An on-board 25 amp AC charger is standard to provide a means for overnight charging.

Reach

The 15.8 m (51 ft 5in) working height, outreach of at least 7.5 m (24 ft 6 in)– for both the Z-45/25 and Z-45/25J models – and up and over clearance of at least 6.9 m (22 ft 6 in) lets you reach higher and farther than ever before.

Increased Strength

Larger, stiffer primary boom and extension tubes offer increased strength and durability. Improved cable track includes box tube support combined with a wider plastic track.

Fewer Parts Overall

Commonality among Z-45/25 models results in fewer service requirements.

Maintenance Made Easy

The Bi-Energy component tray swings out 90° for complete accessibility during routine maintenance and repairs.

Z:45/25 & Z:45/25J DC and Bi-Energy

Standard Features

- 15.8 m (51 ft 5 in) working height
- At least 7.5 m (24 ft 6 in) horizontal reach
- Up and over clearance of over 6.9 m (22 ft 6 in)
- 1.52 m (5 ft) turning radius
- 227 kg (500 lb) lift capacity
- Fully proportional controls
- Hydraulic platform rotation
- 24V DC auxiliary power unit
- Drive enable system
- End mount platform on Z-45/25J models
- AC wiring to platform
- Tilt alarm
- · Horn
- · Hour meter
- Industrial air tyres

Options and **Accessories**

- Alarm package
- Platform swing gate
- · Air line to platform
- Full rail platform pinch guard
- Platform work light
- Platform control box cover
- Foam filled and nonmarking tyre packages

Standards Compliance

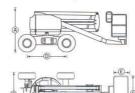

■ CE EN280
