

## Dual Personnel Lift Super Series

**DPL**<sup>TM</sup> SUPER SERIES

The dual  
work platform  
for one or  
two workers  
and their tools.

**Genie Industries**

## Dual Personnel Lift Super Series: An Outstanding Value.

The Genie DPL Super Series delivers savings of up to 50% or more over scissor lifts or booms. Besides its lower cost, the DPL Super Series provides tight-access manoeuvrability, easily handling jobs that many self-propelled products can't access. One-person setup and operation allows versatile use by one or two people. The large platform has ample space for workers and their tools.

### Standard Features

#### The Most Rigid Mast in the Industry.

Genie's patented mast system features high-strength aluminium, interlocking and telescoping mast sections, and heavy-duty lifting chains with a safety factor of greater than 10 to 1. The chains are used throughout the entire system for strength and reliability. The mast is field-adjustable and easy to maintain.

#### Rugged and Durable Base System.

The Genie DPL Super Series features a welded steel base that stands up to tough job site conditions.

#### Rolls Through Single Doorways.

A convenient handle is located on one end of the machine, providing easy steering and manoeuvrability. The 4-position, non-marking swivel lock casters allow 360° rotation in areas as small as 88 x 31 in (2.24 m x 79 cm).

#### Ground Controls.

LED lights confirm proper setup of outriggers. Indicator lights signal low battery (DC models). The platform can be lowered from the ground controls. A locking key switch prevents unauthorised use. The patented outrigger interlock system prevents operation unless all outriggers are installed.

#### Auxiliary Platform Lowering Feature.

All models are equipped with an auxiliary platform lowering feature. Operators can lower themselves from the platform in the event of a power failure.

**Platform Controls.** Dual-activated controls are easy to operate. The Ground Fault Circuit Interrupt power receptacle provides for safe, convenient use of power tools. Safety decals are clearly visible.

**Smooth, Efficient Power.** Choose from AC or DC power. The Genie DPL Super Series provides clean, quiet operation for indoor or outdoor use. A platform mounted GFCI 110 volt electrical outlet is standard equipment on all models.

#### Power Options:

**AC:** 85/50-60 Hz  
110/50-60 Hz  
220/50-60 Hz

**DC:** All DC models include a heavy-duty 190 amp hour 12 volt battery and 20 amp charging system. Charging systems are available in the following input voltages:  
110/50 Hz, 110/60 Hz  
220/50 Hz, 220/60 Hz

#### Outrigger Storage Sockets.

Sockets secure the outriggers during loading and transport. Outrigger storage sockets are conveniently located by each base outrigger socket for ease of setup and use.

#### Multi-Direction Forklift Pocket Access.

Forklift pockets are accessible from all four sides of the machine. Extra-large 9 x 19 cm (3½ x 7½ in) pockets are located on both sides of the machine.

#### Angled Entry Ladder.

The convenient fold-out ladder provides safer, easier platform access.

**Winch Attachment Point.** The conveniently located attachment point allows you to easily winch the DPL Super Series on and off roll-back trucks.

**Tie-Downs.** Sturdy tie-down attachment points are located at each end of the machine.

# DPL™ SUPER SERIES

## Dual Personnel Lift Super Series Standard Features

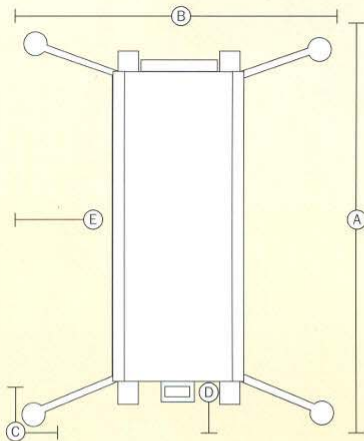

- Designed to fit through a single door
- AC or DC power options
- Auxiliary platform lowering feature
- Tie-down attachment points on each corner
- Swivel-lock casters
- Angled entry ladder
- Ground and platform controls
- Locking key switch
- GFCI 110V electrical outlet in platform

## Options and Accessories

- Tool tray
- Fluorescent tube caddy
- 110V or 220V at 50/60 hz
- Operational warning light and descent alarm
- Platform-locating laser light

## Standards Compliance

- CE indoor compliance
